SERVICES

Limited Liability Company "Ekran UKV" - the first Ukrainian Electronic manufacturing Services provider offers high-complexity electronics manufacturing solutions for Ukrainian and Global market. We build long-term relationship with our customers based on unique customer-focused business policy and high quality of our service.

We offer wide spectrum of electronics manufacturing services such as Customer Design Support, New Product Introduction, PCB and Higher Level Assembly, Cable Assembly, In-Circuit Testing.

QUALITY

High quality of our services and our products - is the key direction of our business. We've built consistent Quality Management System based on international and industry standards that allows to work effectively on global and local markets.

CAPABILITIES

Surface Mount PCB Assembly. Our SMT capabilities include assembly using wide range of components - from 0402 to BGA and uBGA.

Through-Hole and Mixed Technology PCB Assembly. For every customer product we can build unique assembly process using different technologies such as Pin-In-Paste (Intrusive Reflow), Progressive Assembly and Wave Soldering, Mechanical Pre and Post Assembly, etc.

Final Product Assembly. We able to provide complete electro-mechanical product assembly including finished PCB and sub-modules In-Box assembly, Press Fit connectors and Backplane assembly, Cable Wiring, Device Programming, etc.

PCB and Final Product Testing. Based on customer requirements we can perform In-Circuit and Functional PCB testing.

INDUSTRY EXPERIENCE

"EkranUKV" LLC has an experience in production of hi-tech products for Ukrainian and Global market in different fields of electronic industry :

- Telecommunications
- Medicine
- Security and industrial control
- Consumer Electronics

OUR HISTORY

Our company was setup on basis of "Lucent Technologies CheZaRa" Ltd Manufacturing Operations, as a result of restructuring process of Lucent Technologies.

The factory of "Lucent Technologies CheZaRa" Ltd was operating from April 1998 and assembled different types of circuit packs for 5ESS Switching. About 95% of all produced circuit packs were exported to Western Europe and Russia.

Our factory was certified on ISO 9001 and ISO 1400 and produced products in accordance with Lucent Technologies quality requirements and international telecommunication standards.

Our personnel was trained at the Lucent Technologies factories in the Netherlands, Spain and Poland.

In April 2002 "Lucent Technologies CheZaRa" Ltd transferred production equipment and personnel to the new company. From this moment we started our operation as an independent Electronic Manufacturing Services provider.
